

Java?

(Original creator: aschetse)

We have always been a bit critical towards Java, mainly because of

~~the lack of~~

productivity. But did you read this? <http://adtmag.com/blogs/watersworks/2013/01/java-security-woes.aspx> And this is exactly why Uniface will always run in vanilla browsers. No (Java) plug-ins needed at all. And superior development speed as well. What more do you want?
